AKASH PATANKAR

Full-Stack Web Developer (React.js / Node.js)

Bhopal, MP | 8827439284 | akashpatankar987@gmail.com | linkedin.com/in/akash-patankar-631410282 | github.com/akash716 Portfolio

PROFESSIONAL SUMMARY

Full-stack web developer with hands-on experience shipping production React.js and Node.js applications, including a live POS system deployed across 3 hosting platforms. Completed a 1-year web development internship at WebWorks Solution (Aug 2025 - Jul 2026), delivering full-stack and WordPress-based projects across branding, retail, and media industries. Comfortable owning a project end-to-end - frontend, backend, MySQL database design, and deployment - with a strong record of debugging real production issues.

TECHNICAL SKILLS

- Languages: JavaScript, Java, SQL, HTML5, CSS3
- Frontend: React.js, Vite, Responsive/Cross-browser UI, GSAP, REST API integration
- Backend: Node.js, Express, REST APIs, server-side file processing
- Databases: MySQL, SQL, XAMPP, database migration and debugging
- Tools and Platforms: Git, GitHub, VS Code, Vercel, Railway, Render, Cloudinary, Chrome Extension APIs, OpenAI API
- Other: WordPress and Elementor client-site development

EXPERIENCE

Full-Stack Developer Intern, WebWorks Solution | *Aug 2025 - Jul 2026*
Mumbai, India

- Delivered full-stack and WordPress-based websites across 3 industries - branding, retail, and media - including Vendi Chocolates, Go Sarthii, Goswami Storage Racks, and Hangover Media
- Designed, built, and deployed client applications end-to-end across 3+ tech stacks (React.js, Node.js, WordPress), from database schema to production hosting
- Provided ongoing support across 4 technology stacks (React.js, Node.js, MySQL, WordPress), covering bug fixes, feature additions, performance tuning, and deployment troubleshooting

KEY PROJECTS

Vendi Chocolates 2.0 - POS System | *React.js, Node.js, MySQL*

- Shipped and deployed a full-stack Point-of-Sale system for a live chocolate retail business across Railway, Render, and Vercel
- Diagnosed and fixed a MySQL temporary-table overflow caused by large base64-encoded images inside a JOIN query, restoring checkout reliability
- Addressed cross-origin (CORS) issues and fixed Cloudinary URL concatenation bugs across multiple React components
- Added double-tap prevention on checkout and lazy image loading via a shared cache hook to improve performance
- Investigated and settled billing discrepancies and product display ordering issues in the live system

Go Sarthii - Luxury Automotive Website | *React.js, Vite*

- Maintained a luxury automotive brand website built with React and Vite
- Fixed recurring JSX and image-path bugs, updated dynamic content such as the founder biography, and integrated an Instagram gallery feed
- Solved repeated Vercel deployment failures to keep the production site stable

Document Converter Tool | *React.js, Node.js*

- Engineered a full-stack document conversion tool (React frontend, Node.js backend) delivering Merge PDF, Split PDF, Add Watermark, and JPG-to-PDF features behind a clean, responsive interface

Text Extraction and QA Browser Extension | *JavaScript, Chrome Extension API, OpenAI API*

- Created a Chrome extension that extracts visible webpage text in real time and answers questions on it using the OpenAI API

EDUCATION

Master of Computer Applications (MCA) | *Completed Aug 2026*
Ramdeobaba University, Nagpur (Formerly RCOEM) - CGPA: 8.43/10

B.Com (Computer Applications) | *2023*
Government Arts and Commerce Naveen College, Bhopal - 71.33%

Higher Secondary Certificate (HSC) | *2020* | *84%*

Secondary School Certificate (SSC) | *2018* | *86%*

CERTIFICATIONS AND ADDITIONAL INFORMATION

- Certifications (Meta, Coursera): Front-End Development, JavaScript, React Basics. SIH Hackathon participant; Environmental Club member. Languages: English, Hindi, Marathi
